

Thank you for taking my classes. I appreciate it. My cart with trays for turning in work and the pencil sharpener is in the closet; ask Aaron Hutchison (Room 304) to get them out and put them away. Also, ask him to get the calculators from my cupboard under the desk. You will not need the other cart. The "Bell Schedule" is on my board.

Please remind students that they are not to have cell phones/laptops out today (even if it is for music). Also please tell them that I will drop their citizenship grade, if they do not behave. Please write down the names of any students who misbehave and I will take care of that discussion with them on Monday or Tuesday.

All worksheets, notes, and videos are accessible at my website rstokesnuames.weebly.com at the bottom select the button "Sub Resources".

Periods 4 and 8 have a seating chart, I have attached them.

B Day

Periods 5 & 6—Secondary Math 3

First, ask students if they have questions; ask other students if they would answer their questions. .

Today, students will be taking the second part of their tests. Students should remove everything from their desks except a pen/pencil and a calculator. Pass out the tests and make sure to collect them.

If students finish they can work on any homework, read, or put their heads down. Remind them that with testing procedures, they cannot have their phones out.

Period 7 Math Lab

These periods are for students to work on Math homework. They may work in groups or pairs. When they finish their math homework they may work on homework for another class. If they have none, they may read a book. These are the only options. Make a special emphasis that students cannot have phones, laptops or any other electronic device.

Period 8—Mathematical Decision Making

First remind students that tomorrow is the last day that they can turn in any of their unit 1 homework for credit.

Today students will be learning about Linear Modeling. Handout student notes "2.2 Linear Models". Have students watch the two videos in the MDM Resource Folder to my website under the Sub Resources (if you are having trouble with the sound, ask Aaron to come over). Please make sure to emphasize that the videos do NOT follow the notes. When they finish the videos, their assignment is to complete all the examples in the notes and prepare to discuss them on Monday.

If you need any other assistance, please contact Holly or Aaron. Thank you again.
